

The texture of home

COLLECTIONS 2026

Home begins with a feeling.

Light falls across the wall. Fibres, fine threads and small decorative details emerge. A simple surface becomes a part of the room you want to linger over.

Bravo 107 / detail of the original sample

AVRORA is Kazakhstan's only manufacturer of liquid wallpaper. Our wall finishes bring distinctive texture, a rich palette and everyday practicality into your home.

From inspiration to your chosen finish.

In the digital edition, click a swatch to open the product page. Make your final choice of colour and texture using a physical sample.

Three reasons to take a closer look.

01 A seamless surface

Applied as one continuous layer, the finish needs no pattern matching or joins between wallpaper strips. Careful surface preparation remains essential.

02 Texture with character

Fibres, threads and decorative inclusions give the wall depth. The same sample reveals different qualities in direct light and light from the side.

03 Local repairs are possible

Small areas can be refreshed with compatible material. Keep some dry mix, the label and the batch details, and test the repair on a small area first.

Is this finish right for your room? Consider the surface, humidity and intended care routine. Check the conditions with your retailer before ordering.

Beauty. Comfort. Everyday practicality.

AVRORA liquid wallpaper pairs expressive design with practical qualities that make a home more comfortable and the material easier to work with.

01 Antistatic properties

The finish does not accumulate static electricity.

02 Water-vapour permeability

Allows water vapour to pass through, so walls can “breathe”.

03 Thermal insulation

The fibrous structure helps retain warmth and comfort.

04 Sound absorption

The textured finish contributes to sound absorption.

05 Resistance to cold

The finish resists the effects of low temperatures.

06 Repairable finish

Small areas of damage can be repaired without replacing the rest of the finish.

07 Easy application

Mix with water, then spread easily with a plastic trowel.

08 A complete finish

A finished decorative surface, with no extra painting required.

BEAUTIFUL WALLS. COMFORT IN EVERY DETAIL.

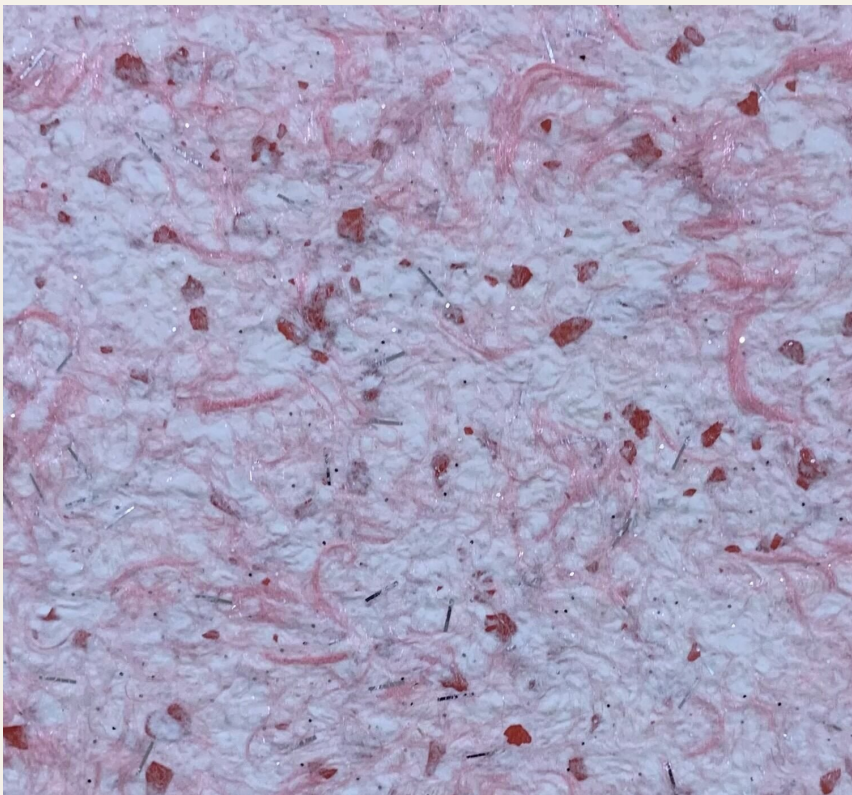

01 / INTERIOR PALETTE

A softer morning.

AI-generated interior concept inspired by Silkway 603.

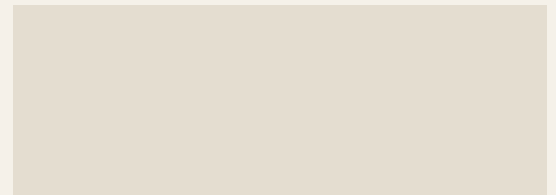

A rose tone that feels at home.

A layered, pale texture feels calmer beside soft ivory textiles and dark wood. A deep plum accent draws the composition together.

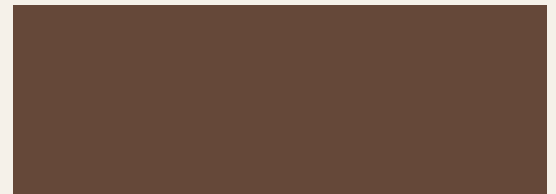

Silkway 603

Soft ivory textiles

Dark walnut

A deep plum accent

These pages suggest a direction for combining materials. The interior visualisation is not a product colour reference. Compare a physical sample in your own lighting.

Cool light. Warm wood.

A light base with coloured details brings the wall, furniture and daylight together. An uncluttered wall gives the texture room to be seen.

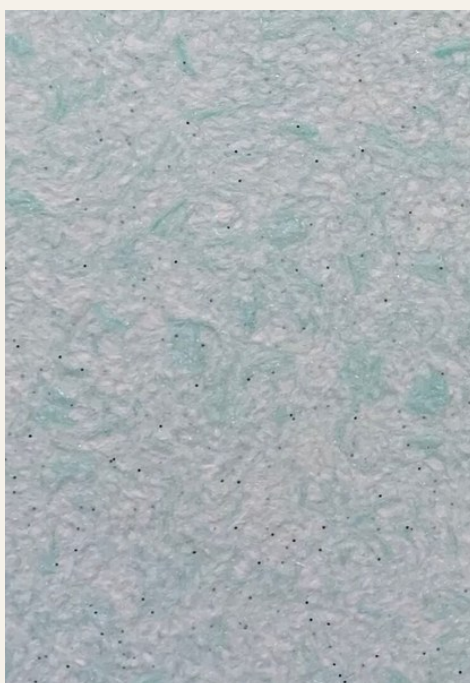

AI-generated interior concept inspired by Decor 229.

Find your shade of cool.

Decor 229

A light base with small coloured flecks.

Bravo 129

Soft hints of green.

Silkway 629

Distinctive fibres with green details.

Place flooring and upholstery samples alongside the finish. Compare the combination in daylight and evening light. Narrow it down to two options and hold them against the wall.

Everyday life. In clean lines.

Light grey texture, clear geometry and warm materials. Let the smaller details stand out while the overall palette stays calm.

AI-generated interior concept inspired by Silkway 623.

One material. Two perspectives.

Silkway 623 / original sample detail, illustrative scale

Up close

Look at the fibres, decorative inclusions and relief.
Notice the edges and the quality of the application.

From a distance

Consider the overall shade and how the wall works with
your furniture. The impression changes as the light
shifts.

Your texture is waiting.

11 collections. Create a shortlist, then compare physical samples.

A beautiful finish starts before you apply.

01 Check the surface

The surface must be sound and properly prepared. Remove loose layers, level noticeable unevenness and address the cause of any stains. Confirm a compatible primer.

02 Prepare the mix

Follow the instructions for your chosen product. Water quantity, mixing method and soaking time may vary. Keep the packaging.

03 Apply evenly

Use a plastic trowel. Plan to work across the whole wall, from corner to corner, and keep to the specified layer thickness.

04 Inspect once dry

Inspect the wall in daylight and with light from the side. Check junctions, socket edges and the consistency of the texture.

Full guide and video
on the AVRORA website

Measure the walls, not the floor.

Measure each surface, subtract doors and windows, and add any reveals you plan to coat. Confirm coverage for your chosen product and the surface it will be applied to.

WORKED EXAMPLE

$$24 \text{ m}^2 \div 3 \text{ m}^2 = 8$$

24 m² is the example wall area.

3 m² is the assumed coverage per pack.

8 packs, before adding an agreed allowance.

This illustrates the calculation; it is not an AVRORA coverage specification. Use the figure on the pack or confirmed by your retailer. Round up to whole packs and agree any extra allowance separately.

AVRORA calculator

Wall areas, openings and an initial quantity estimate.

Keep a little material. Enjoy peace of mind.

Ecostroy M-13 / original sample

Keep

Keep the label, product code and batch details. Dry any leftover mix and store it clean and dry, following the manufacturer's recommendations.

Check

Confirm the right care and repair method. If a stain or lifting appears, identify the cause before refreshing the finish.

Check whether the chosen finish is washable. For damp areas or regular wet cleaning, agree on a suitable material and protective system before application.

From a sample to the right order.

For your home

Shortlist two or three product codes. Bring wall measurements, photos of the surface and samples of adjacent materials. Ask your retailer to confirm coverage, preparation and care.

For dealers

Talk to us about your range, samples and in-store displays. Our sales team will confirm current prices, availability, delivery times and partnership terms.

SELECTION SHEET

Room / area to be coated

Collection / product code / batch

Quantity / allowance / preparation

Date / retailer / contact

The price per pack is only part of the project cost. Consider the finish, preparation, tools and labour together.

AVRORA-STROY LLP

Your home. Your texture.

We'll help you find the finish
that feels at home in your interior.
